

Unlocking Higher Education

Navigating University Admissions via Non-Traditional Pathways

Free online webinar, 3 September 2026, 1pm-2pm

Not everyone reaches university the same way. You may have studied for your GCSEs and A levels from home, balanced learning alongside family or work commitments, or returned to education after a break.

This webinar has been designed to help you recognise the strengths of your non-traditional educational pathway, understand the higher education admissions process and present your application with confidence.

**Delivered
by NEC, with
Gemma Standen
from the
University of
East Anglia**

During this event, you will:

- Discover how universities assess applications and the qualities, skills and experiences they value
- Learn how to make the strongest possible UCAS application - whatever route you have taken
- Find out how to turn life experience, career history, and independent study into a personal statement that stands out
- Explore the guidance, support and resources available to help you at every stage of your application - and beyond

**Come along and bring any questions you have.
We look forward to welcoming you.**
